

To whom it may concern:

I am an amateur radio enthusiast, NQ1K, who is in total agreement with the petition of the ARRL concerning segmentation of the 160M band into a CW and Phone portion. I have been a frequent operator in CW segment of 160M band for the past 10 years and have accomplished /derived much personal satisfaction in the number of contacts made and the great distances (DX) I have been able to work in that segment. I consider the amateur frequencies to be a valuable natural resource that must be maintained for all to continue to enjoy as I and my fellow respondents do and hope to continue to enjoy.

Thank you for consideration in favor of RM-10352

Sincerely,

John P. Larson NQ1K
